

# PEER Evaluation Form for Group Work (Delivery 2)

## Group # 3

Write the name of each of your group members in a separate column. For each person, indicate the extent to which you agree with the statement on the left, using a scale of 1-4 (1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree). Total numbers in each Column.

| Evaluation Criteria                                      | Tessa Cloutier | Gabriella Crook | Ashvin Kawleswaran | Monabbir Bhuiyan | Sandeepon Saha |
|----------------------------------------------------------|----------------|-----------------|--------------------|------------------|----------------|
| Attends group meetings regularly and arrives on time.    | 4              | 4               | 4                  | 4                | 1              |
| Contributes meaningfully to group discussions            | 4              | 4               | 4                  | 4                | 1              |
| Completes group assignments on time.                     | 4              | 4               | 4                  | 4                | 1              |
| Prepares work in a quality manner.                       | 4              | 4               | 4                  | 4                | 1              |
| Demonstrates a cooperative and supportive attitude.      | 4              | 4               | 4                  | 4                | 1              |
| Contributes significantly to the success of the project. | 4              | 4               | 4                  | 4                | 1              |
| TOTALS                                                   | 24             | 24              | 24                 | 24               | 6              |

## Feedback on team dynamics:

### 1. How effectively did your group work? (List at least 3 things)

- **Strategic Role Allocation:** We established a clear division of labor among the active team members, assigning specific roles based on individual strengths. For example, during our recent QA phase, we strategically distributed the fully implemented user stories so that we were testing features we did not originally build.
- **Proactive Problem Solving:** Building a system that relies heavily on survey-driven data required tight integration between the backend and the GUI. Whenever technical ambiguities arose, the contributing members held immediate ad-hoc meetings to address them before they could impact our timeline.
- **Collaborative Decision Making:** The active members of the team maintained a shared vision for GroupPilot's end goal. We navigated differing perspectives through structured brainstorming sessions, which helped us efficiently transition our core concepts into functional user stories.

### 2. Were the behaviors of any of your team members particularly valuable or detrimental

#### to the team? Explain. (List at least 3 things)

- **Detrimental - Lack of Contribution:** Unfortunately, Sandeepon did not contribute to the project or the codebase. This lack of communication and failure to deliver on any assigned tasks was detrimental to the team, as the rest of us had to abruptly step in and absorb his portion of the workload to ensure the project was completed on time.
- **Valuable - Reliability and Accessibility:** A defining strength of the rest of our group was mutual accountability. Gabriella, Tessa, Ashvin, and Monabbir were consistently reachable and ready to provide support whenever someone encountered a roadblock or when we needed to redistribute unfinished tasks.
- **Valuable - Targeted Expertise:** The contributing members brought highly specific skills to the table. Ashvin's work on the backend logic (like Survey-Based Group Formation) was a massive asset. Tessa and Gabriella's strong organizational skills helped us drastically reduce the time spent on documentation and the backend and GUI for the Team availability. Meanwhile, Monabbir utilized his frontend expertise to quickly build out the GUI and connect the complex group formation interfaces and the backend for weekly survey.

**3. What did you learn about working in a group from this project that you will carry into your next group experience? (List at least 3 things)**

- **The Importance of Contingency Planning:** Dealing with a non-contributing team member taught us that it is necessary to identify those issues early. We learned how crucial it is to have a backup plan and be ready to quickly redistribute workload when someone fails to communicate or deliver.
- **Prioritizing a Robust Planning Phase:** We learned that a project's success is directly tied to the quality of its initial plan. Breaking down features into end-to-end scenarios from the customer's perspective ensures that development stays on track, even if the team is short-handed.
- **Strict Time Management:** Setting granular deadlines for specific tasks is vital. Coordinating across a team taught us that disciplined time management not only reduces end-of-cycle stress but also provides a buffer to handle unexpected issues, like having to write additional code or run extra tests to cover for a missing member.
