

PEER Evalutaion Form for Group Work

Group # 3

Write the name of each of your group members in a separate column. For each person, indicate the extent to which you agree with the statement on the left, using a scale of 1-4 (1=strongly disagree; 2=disagree; 3=agree; 4=strongly agree). Total numbers in each Column.

Evaluation Criteria	Tessa Cloutier	Gabriella Crook	Ashvin Kawleswaran	Monabbir Bhuiyan	Sandeepon Saha
Attends group meetings regularly and arrives on time.	4	4	4	4	2
Contributes meaningfully to group discussions	4	4	4	4	2
Completes group assignments on time.	4	4	4	4	3
Prepares work in a quality manner.	4	4	4	4	3
Demonstrates a cooperative and supportive attitude.	4	4	4	4	4
Contributes significantly to the success of the project.	4	4	4	4	3
TOTALS	24	24	24	24	17

Feedback on team dynamics:

1. How effectively did your group work? (List at least 3 things)

- **Strategic Role Allocation:** We established a clear division of labor early in the process, assigning specific team members to backend development, frontend implementation, and UI/UX design based on individual strengths.
- **Proactive Conflict Resolution:** Whenever technical ambiguities or project confusions arose, we held immediate ad-hoc meetings to address issues carefully and ensure they were resolved before they could impact our timeline.
- **Collaborative Decision Making:** While we maintained a shared vision for the project's end goal, we navigated differing perspectives through structured brainstorming sessions to determine the most efficient technical paths forward.

2. Were the behaviors of any of your team members particularly valuable or detrimental to the team? Explain. (List at least 3 things)

- **Reliability and Accessibility:** A defining strength of our group was mutual accountability; every member was consistently reachable and ready to provide support whenever a teammate encountered a roadblock.
- **Technical Leadership:** Ashvin's proficiency in Java was a significant asset to the team. His ability to translate complex conceptual ideas into functional code, while simultaneously mentoring others on the framework, greatly accelerated our progress. Also Tessa and Gabriella's writing skills helped us reduce time on the documentations. And Monabbir's GUI and frontend expertise helped us build the GUI in no time.
- **Initial Learning Curves:** We initially experienced some delays due to varying levels of familiarity with our chosen tech stack. These knowledge gaps required an adjustment period at the start of the project to ensure everyone could contribute effectively.

3. What did you learn about working in a group from this project that you will carry into your next group experience? (List at least 3 things)

- **Prioritizing a Robust Planning Phase:** I've learned that a project's success is directly tied to the quality of its initial plan; without a clear roadmap, development becomes fragmented and inefficient.
- **The Necessity of Continuous Documentation:** I now recognize that documentation must be a living process. Recording and communicating every change immediately is essential to keeping all stakeholders synchronized and avoiding technical debt.
- **Strict Time Management:** Setting granular deadlines for specific tasks is crucial. I've learned that disciplined time management not only reduces end-of-cycle stress but also allows for more thorough testing and a higher-quality final product.
